Target version:	2.0.4		
Resolution:	Fixed	**Affected version:**	2.0.3

Description

If Wiki diff has a new line (not a changed line), diff page may generates broken HTML like:

```
<div class="text-diff">
h1. CookBook documentation
<br /> Some updated [[documentation]] here... <span class="diff_in">
<br /> More contents...&lt;/span&gt;
</div>
```

Close tag is escaped.

For example:

Before

```
h1. CookBook documentation
Some updated [[documentation]] here...
```

After:

```
h1. CookBook documentation
Some updated [[documentation]] here...
More contents...
```

"More contents..." line is added. This case, diff page generates broken HTML.

I attach a patch and test case for this issue.
It adds a new fixture data. So it may break other tests. I only tested this patch against test/functional/wiki_controller_test.rb. Sorry.
