Description

Hi,

Our developers want to split %Done into smaller steps, but I don't want to do this within the dropdown-list, it will become too long. I am working around to make %Done become an editable dropdown-list, I have tried to add some javascript but failed. I also tried to use 'prompt_to_remote' to add a remote f.select like Category Add button, but I failed too. Do you have any hint for me?
Thanks you in advanced!

Regards

I'm closing this as it is more or less a duplicate of #373.

Please read my comment (#373-3) on this. This could be the feature you had requested.
