Description

Hi,

I trying to migrate database from v.2.1.4 to v.2.4.1 and when i had click to 'activity', 'issues', 'gant diagramm' and 'settings' i got an error 500.
It's strange, because with db from v.2.4.1 it's working correctly and when i had installed the Redmine v.2.4.1 and trying to migrate the database from latest Redmine version i had got an error.
Please clarify, it's very strange for me.
Thank you.

The log is

```
Connecting to database specified by database.yml
Creating scope :system. Overwriting existing method Enumeration.system.

Hi,

This file is also have 'attr_protected :fields_bits'
I had used the latest Redmine for install, only database from older version.

#3 - 2013-12-07 09:52 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid
