Redmine - Feature #19824

Could redmine control permission of edit/delete my own issue

Description

Hi guys,

I've searched issue repo and found out that #1248 and #7444 is similar to my request. But it seems #1248 is still 'NEW' for years, and #7444 is only patch of controlling issue permissions but not OWN issue perssions. What I need is permission control like redmine forums, which has 'Edit own message' and 'Delete own message option'.
