**Description**

Some "notifiable" names are not i18n-enabled. I see three untranslatable strings in /settings?tab=notifications:

- Issue note added
- Issue status updated
- Issue priority updated

I tracked the issue back to SettingsHelper::notification_field(notifiable) which uses l_or_humanize on notifiable.name.

### Associated revisions

**Revision 5357 - 2011-04-07 22:53 - Jean-Philippe Lang**

Adds missing strings for notification settings (#8075).

### History

**#1 - 2011-04-05 19:32 - Etienne Massip**

*- Target version set to Candidate for next major release*

**#2 - 2011-04-07 22:55 - Jean-Philippe Lang**

*- Status changed from New to Closed*

*- Target version changed from Candidate for next major release to 1.2.0*

*- Resolution set to Fixed*

Strings added to locales in r5357.
