Category:	UI	**Estimated time:**	0.00 hour
Target version:	3.3.0		

Description

For multiple value list custom fields there is no text wrap when displayed as a column on issue list, this breaks page layout.

This should be added to application.css:

tr.issue td.subject, tr.issue td.category, td.assigned_to, tr.issue td.string, tr.issue td.text, **tr.issue td.list,** tr.issue td.relations, tr.issue td.parent { white-space: normal; }
