Tried it on diferent browsers : Chrome, ie9, Firefox, Safari.

#8 - 2013-02-08 09:12 - Daniel Felix

I tried this on my testmaschine (with redmine trunk). I can't confirm this. On my maschine everything works well.

Do you have any log entries regarding this? Maybe something went wrong inside your installation? Can you provide a log?

Or maybe check this with Firefox + Firebug enabled and check console for any errors?

I checked Firebug console and Chrome Developer Tools Console and i found no errors.
I send you the log in redmine folder.

I resolved the problem by reinstalling redmine on my server, and now everything works fine.
I still dont´t know what happened, problably something went wrong with the other installation like Daniel said.
I guess you can close this issue.
Thank´s for all the help you gave me.

Nuno.
