Description

According to below wiki, there is no way to access version's related wiki page.("version_wiki_page_title")

Rest_Versions

We expect more extended REST API like follows,

```
<?xml version="1.0" encoding="UTF-8"?>
<versions type="array" total_count="34">
  <version>
    <id>1</id>
    <project name="Redmine" id="1"/>
    <name>0.7</name>
    <description/>
    <status>closed</status>
    <due_date>2008-04-28</due_date>

Just ran into the same thing, and decided to get a fix in place right away. This works for us. Output is not exactly as shown above, but like this (taking the same data as example)

```
<?xml version="1.0" encoding="UTF-8"?>
<versions type="array" total_count="34">
  <version>
    <id>1</id>
    <project name="Redmine" id="1"/>
    <name>0.7</name>

    <updated_on>2009-11-15T12:22:12+01:00</updated_on>
    <wiki_page_title>FooBarWikiPage</wiki_page_title>
  </version>
</versions>
```

- File 26237-test-update.diff added

- Target version set to 4.1.0

LGTM. I updated a test.
Setting target version to 4.1.0.

#5 - 2018-09-30 18:41 - Kenan Dervisevic

Is it possible to get this in 4.0.0? It's a small fix, so I guess it's not a problem to change the target release.

#6 - 2018-11-28 06:31 - Mizuki ISHIKAWA

- File add_put_and_post_test.patch added

I added PUT and POST tests to the test code written by Go MAEDA.
versions_api_wiki_page_title.diff works as expected.
