Description

Hey there,

I just tried to upload a userdefined profile picture in our intranet-system.

It seems, that Redmine doesn't support this feature. The only way to integrate it, is to define a gravatar account with my business mailadress, which isn't the best way i think.

My other option is to integrate this Plugin: http://www.redmine.org/plugins/redmine_local_avatars

But this seems fairly outdated. It would be great to have this feature out of the box integrated.

Best regards

History

#1 - 2013-04-19 19:20 - @ go2null

Feature #13536 asks for LDAP Avatar, in addition to a Local Avatar.

There is also Local Avatars Plugin although it too is for Redmine 1.0.
