Target version:			
Resolution:		**Affected version:**	

Description

I've got a problem with a project respository setting in Redmine, in that; I've tried to set a repository with GIT, entered an invalid GIT path, and now I'm stuck as I can't seem to delete the path which has been set.

Clicking delete sends me to the next page, stating that the following;

Ideally I want to delete this repository reference, and put in a SVN repository instead. I've tried to rejig the system by taking out GIT in the Administration/Settings/Repositories panel, and leaving just subversion. However, this does nothing for the project's stuck GIT repository setting.

Help! What file should I edit to delete these project settings? I'm a bit wary, as I don't want my project potentially corrupted.

Associated revisions

Revision 6130 - 2011-06-30 05:46 - Toshi MARUYAMA

scm: return nil at model default_branch and override at git model (#8458, #6713).

Redmine Git and Mercurial adapter support **branches**.
Mercurial default branch is **dafault**.
But, it is popular to show all revisions on the top page for Mercurial GUI.

scm: git: add functional test of destroying invalid repository (#6713, #4725).

History

#1 - 2010-10-20 18:25 - Gareth Brown

Error Message Recieved when trying to delete the invalid GIT repository setup;

An error occurred when trying to access the repository; No such file or directory - git --git-dir "-/" branch

#2 - 2010-10-27 23:26 - Jean-Baptiste Barth

Can you provide the exact error message, the eventual error in the logs, and the informations listed in SubmittingBugs ? Everything works fine on my installations when I try to delete repositories..

#3 - 2011-01-06 12:19 - Toshi MARUYAMA

- Category set to SCM

#4 - 2011-02-06 16:21 - Suleyman Arslan

i have same problem. Actually i don't have git on my system and i am not using git. By mistake i put some directory text on repository settings and save it. Now i am not able to delete repository settings.
When i click Delete button following message appear.
500
An error occurred when trying to access the repository: No such file or directory - git --git-dir "C:\Git-repository\.git/" branch --no-color
