Redmine - Feature #3474

Make date range in module Activity selectable through user

2009-06-10 10:40 - Jens Goldhammer

Description

The activity module shows per default only the last days and I navigate to the days before... It is ok, but not really useful for someone who was in holiday and only wants to see what happens in the time he was absent.

Trac provides the possibility to select the date range for which the items should be shown. Please look at the screenshot
