Category:		**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	

Description

I have installed redmine 3.3 official docker and when I try to create a new issue with a assigned_to filled the value is not saved, even coming in the request

In the log no error is displayed, however the value is not filled, if I edit the issue and fill in the field again then it works.
