Target version:			
Resolution:	Invalid	**Affected version:**	

Description

"[abc]defg" in the starting of the line, it is not displayed correctly.
I am using such a lot of descriptions in the repository log.
It seems to occur at a point using "textilizable".

For exampe;
[test] test(OK)
[test]test(NG)

```
I wrote the following in the upper.
[test] test(OK)
[test]test(NG)
```

About application's environment
Redmine 0.8.3
Ruby version 1.8.5 (i386-linux)
RubyGems version 1.3.1
Rails version 2.1.2
Active Record version 2.1.2
Action Pack version 2.1.2
Active Resource version 2.1.2
Action Mailer version 2.1.2
Active Support version 2.1.2
Edge Rails revision unknown
Application root /var/redmine
Environment development
Database adapter mysql

History

#1 - 2009-09-11 07:50 - ko simo

- Status changed from New to Resolved

I realized that this specification Link Aliases of Textile.

#2 - 2009-09-21 02:11 - Mischa The Evil

- Category deleted (Text formatting)

- Status changed from Resolved to Closed

- Resolution set to Invalid

Re-open if needed.
