Description

Hi

in #38511 someone tried to highlight me but since my name is "Hendrik Jäger" and only this part is actually displayed, they chose the obvious but wrong highlight (at)Hendrik, which is not me but "Hendrik Adam" (I'm (at)henk).

It would be nice to have better completion for this. The mechanism for completing ticket numbers with the popup would be well suited but it would have to search for both login-names and real-names.

Thanks for considering!

It was already implemented in Redmine 5.0.0 (Feature #13919: Mention user on issues and wiki pages using @user with autocomplete). However, the version of Redmine used in www.redmine.org does not support the feature.

oh, cool, thanks. This issue can be closed, then, I guess?
