Description

here: http://www.redmine.org/projects/redmine/wiki/Alternativecustom_authentication_HowTo

The doc said:

> Implement Your AuthSource Subclass
> Create a new file for your AuthSource subclass in app/models/, following the naming scheme of the existing auth_source.rb and auth_source_ldap.rb.
>
> - Here we'll use ~~app/models/auth_source_myApp.rb~~

The exact filename should match the Class name: AuthSourceMyCustomApp

Correct filename is: app/models/auth_source_my_custom_app.rb

History

#1 - 2014-10-04 09:51 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

Fixed, thanks.
