Target version:			
Resolution:		**Affected version:**	4.2.8

Description

This actually affects 4.2.9 but didn't see 4.2.9 on the list.

When looking at issues in the Issues view in a parent project, using the context menu to make changes redirects to the subproject instead of back to the parent view. The url that is passed seems to be correct.

Environment production
Database adapter PostgreSQL (13)
Mailer queue ActiveJob::QueueAdapters::AsyncAdapter
Mailer delivery smtp
