Description

It would be really useful to have the option to display the amount of time logged, and the associated comment as part of an issue's history. I find that I tend to copy/paste the log message into a note and submit that each time I log time (so management has that record, especially when it is associated with progress towards a goal being changed).

This could be a toggle-able option in case people don't want it :P

Just in case my definition wasn't very clear, this is what I mean:

#2 - 2010-11-12 11:21 - Nils Linde

I agree. I dont know why they did not made like this in original. History should show all changes for issue. If there is some time log for issue, it should be shown in history too!
