Category:	Issues	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Fixed		

Description

I would like to see a feature allowing users to choose which issue query they will see when visiting /projects/${projectid}/issues

They should be able to choose from global queries as well as self-created and default ones.

- Resolution set to Fixed

The default issue query feature will be available in Redmine 5.0.0 (#7360).

Default queries can be set at three levels: application, project, and user.
