

## Redmine - Feature #4519

### Target version pulldown should sort in descending order

<b>Description</b> I'd like things like the version pulldown to be sorted in descending order. This is because the most common action is associate new/unversioned issues with the "latest" version.

Sounds like a feature request, doesnt it.

That said, i would add a +1 for a chance to config sort order on version and category.

- File roadmapPulldown.png added

- Tracker changed from Defect to Feature

This is more likely a feature request than a bug.

But I would agree, some type of sort would be some improvement for this!
