Redmine - Feature #6846

Add VIM-like keyboard shortcuts

2010-11-08 01:26 - David Petersen

Status:	New	**Start date:**	2010-11-08
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	UI	**Estimated time:**	0.00 hour
Target version:	Unplanned backlogs		
Resolution:			

Description

It would be very sweet to be able to navigation the issues list from the keyboard.
examples:

j: down
k: up
o: open/view issue
x: select issue (allowing for multiple issue selection)
?: show keyboard shortcut help

I am sure there are more that would be helpful

Kind of. But here we're speaking about javascript based shortcuts that do not require using Ctrl/Alt/Shift keys like regular html accesskeys.

#4 - 2011-03-15 18:31 - Steve Koppelman

Shortcuts assigned to unmodified keys would also have the advantage of being likely to work on OS X instead of being overridden by system keybindings. :)

#5 - 2011-11-11 16:11 - Austin Smith

I've implemented these shortcuts in a plugin: https://github.com/netaustin/redmine_keyboard_shortcuts

It still needs testing, but it supports these features and more in Chrome and FF.

#6 - 2011-12-09 22:39 - Brian Jacobi

Anyone test this yet? When we POC'ed Jira, users really liked having the shortcuts available

#7 - 2012-05-10 05:55 - Steven Wong

that's it .i used for firefox.

but it could not support the internet explorer.

#8 - 2013-09-16 20:59 - Arkhitech - More, Better, Faster!

+1 for adding this feature. Redmine is missing this key feature which is now becoming quite hot, and time is ticking.

#9 - 2014-02-09 22:46 - Anonymous

+1

#10 - 2014-05-08 02:02 - Szabolcs Szasz

Would be nice to rename this isse, and the related plugin, to "VIM-like" shortcuts. (Or, better yet (but harder): shift the focus explicitly toward *customizable* shortcuts.)

Most of those, who also desperately need keyboard shortcuts *in general* for Redmine, but come (e.g. here, via Google) from all the various other directions than vi, may feel a bit puzzled about why "the" keyboard shortcuts feature of Redmine should mean e.g. "k" for up and "j" for down. ;) Cheers!

#11 - 2014-06-04 01:44 - Toshi MARUYAMA

- Subject changed from Add keyboard shortcuts to Add VIM-like keyboard shortcuts

#12 - 2014-06-04 01:44 - Toshi MARUYAMA
