Redmine - Feature #26680

Show default assignee when creating new issue

2017-08-14 14:55 - Andreas Deininger

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:	Candidate for next major release			
Resolution:				

Description

With new redmine version, 3.4, a default assignee can be specified (which is great).

However, contrary to a stipulated default target version, the stipluated default assignee does show up when creating a new ticket:

DefaultAssignee.png

It would be nice to see the default assignee immediately in place when creating a new issue. When changing the category and the default assignee wasn't changed yet, it could be set to assignee responsible for this category.

Note: This feature wish was discussed and approved in #26072 already, with this ticket, we now have a separate issue for this feature request in place.

Go Maeda, the patch 0002-Set-default_assigned_to_id-in-project.patch from #15919 is not ready for commit from my point of view. I'll add my feedback soon.

Yes, I found a problem that assignee field is not set when a user opens "New issue" page.

It is easy to fix this issue, but what should be the expected results for the following case:

1. Go to project settings
2. Set a default assignee
3. Set category A with no assignee
4. Set category B with a default assignee different than the default project assignee
5. Go to new issue page
6. The default project assignee is automatically selected
7. Select category A
8. Select category B

Expected results for steps 7 and 8 from my point of view:
7. The default project assignee remains selected because the category A has no default assignee
8. Assignee changes from project default assignee to category default assignee
