

Redmine - Defect #28243

Principal.not_member_of scope does not accept ActiveRecord::Relation

2018-02-25 20:46 - Anonymous

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:	6.0.0	Affected version:	
Resolution:			
Description			
<p>Principal model has the following two scopes: member_of and not_member_of, both of them expect project or collection of projects as an argument. The problem is that given</p> <pre>projects = Project.where(:name => 'My Project')</pre> <p>you'll get correct results from</p> <pre>Principal.member_of(projects)</pre> <p>, but an exception will be thrown if you'll try to run</p> <pre>Principal.not_member_of(projects)</pre> <p>. That's because not_member_of puts its argument into an array if it's not a subclass of Array (which Project::ActiveRecord_Relation is not, though it knows how to #map).</p> <p>I think one should be able to call both member_of and not_member_of with any kind of project collection, not just Array, and both of them should process arguments in the same way. So I provide a patch for that.</p>
