Redmine - Feature #37169

Update sanitization rules to allow footnotes markup to match the original structure

2022-05-28 11:38 - Marius BĂLTEANU

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**

Category:	Text formatting		**Estimated time:**	0.00 hour
Target version:	6.0.0			
Resolution:				

Description

This is related to [#35892](#).

The sanitisation rules should allow footnotes markup to render as they are generated by commonmark gem for easier customisations.

History

#1 - 2022-05-30 13:08 - Holger Just

Is this resolved with [r21612](#) already or are there any further required steps?

#2 - 2022-05-31 08:34 - Marius BĂLTEANU

- File footnotes.png added

This is how it looks without SanitizationFilter:

footnotes.png

And I think it is useful to have the data-footnote-* attributes, the class and even the section element. I've already some working code to obtain this.

What do you think?

#3 - 2022-06-16 16:57 - Holger Just

I'm not opposed to this :)

I'm not sure the data attributes are required for us, given that we don't have anything in Redmine which wants this (specifically: no browser JS leveraging those attributes).

The aria-label and class attributes are probably useful though, as might be the section.

#4 - 2023-10-07 05:54 - Go MAEDA

- Target version changed from 5.1.0 to 6.0.0
