

Redmine - Defect #40657

Rest API - filtering by regular expression

2024-05-04 09:57 - Petr Müller

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
<p>Hello, on following link: https://www.redmine.org/boards/2/topics/36299 i found example how to do "full search" by something. Like this: http://www.redmine.org/issues.xml?project_id=redmine&cf_2=*ix*&limit=100 but is returns much more result than required. For example: clipboard-202405040952-xmekf.png Duplicate doesnt contain "ix" Please register as bug to be corrected. PS: It works same on 5.1.2.stable version. Searching "*man" and returns record with: <custom_field id="6" name="HBpotencialProviders"> <value>15,16</value></p>			
Thanks Petr			

History

#1 - 2024-05-04 10:05 - Petr Müller

I noticed just now that **"*something"** doesnt work.
Sorry, please reject this issue :(
If you could direct me where is explain how regular expresions works in Redmine REST API, please help.
Thanks for understanding.
Petr
