Is it right that I have to copy this part:

```
  # Returns true if user or current user is allowed to edit or add a note to the issue
  def editable?(user=User.current)
-   user.allowed_to?(:edit_issues, project) || user.allowed_to?(:add_issue_notes, project)
+   if self.closed?
+     return user.allowed_to?(:add_closed_issue_notes, project)
+   else
+     return user.allowed_to?(:edit_issues, project) || user.allowed_to?(:add_issue_notes, project)
+   end
  end

  def initialize(attributes=nil, *args)
```

into the file app/models/issue.rb

and copy this part:

```
   map.permission :set_issues_private, {}
   map.permission :set_own_issues_private, {}, :require => :loggedin
   map.permission :add_issue_notes, {:issues => [:edit, :update, :update_form], :journals => [:new],
:attachments => :upload}
+   map.permission :add_closed_issue_notes, {:issues => [:edit,
+ :update, :update_form], :journals => [:new], :attachments => :upload}
   map.permission :edit_issue_notes, {:journals => :edit}, :require => :loggedin
   map.permission :edit_own_issue_notes, {:journals => :edit}, :require => :loggedin
   map.permission :view_private_notes, {}, :read => true, :require => :member
```

into the file lib/redmine.rb? I tried that and restartet the server -> redmine did not start anymore. What else do I have to do? Remove those "+" and "-"? What does @@ -148,7 +148,11 @@ and @@ -116,6 +116,7 @@ say?

What I see when I open the script in a text editor:
