

Still broken precedes/follows relationships using Redmine 1.1

Step 1) Create a project with 3 tasks/issues, all of them with the same start and end date, let's say from Jan 7 to Jan 11. The gantt will look as follows:

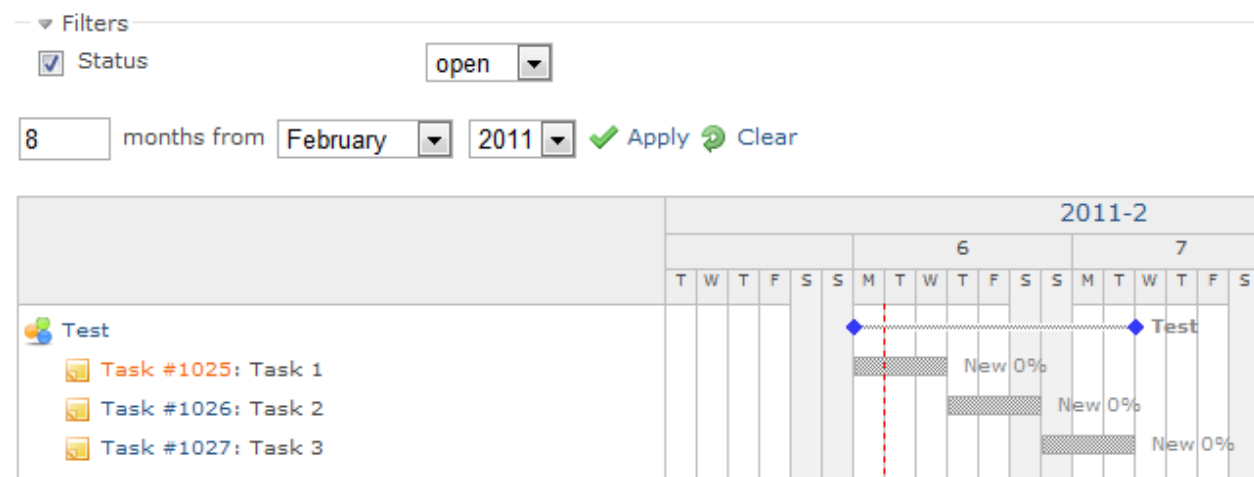

Gantt

Step 2) Make Task 2 to follow Task 1 with a 0 days delay and Task 3 to follow Task 2 with 0 days delay.

The gantt will look as follows, showing that in fact, Tasks 2 and 3 were modified accordingly.

Gantt

Step 3) Change Task 1 end date 1 day before the original end date, in this case Jan 8.

The gantt will look as follows, showing that in this case, Task 2 and 3 dates were not modified.

Gantt
