Description

I have a wiki page with an inline image that references a png file which is an attachment(that part works fine). If I include that page in another wiki page (using the include macro) the inline image does not appear. I even tried adding the same image as an attachment to the wiki page that is including the original page, but that does not work either.

Associated revisions

Revision 1327 - 2008-04-05 19:39 - Jean-Philippe Lang

Fixed: inline image not displayed when including a wiki page (closes #1001).
