<b>Resolution:</b>	
<b>Description</b> It could be nice if we could set e-mail notification per project globally, not just user based.  There could also be an option where this is, <ul style="list-style-type: none"><li>• A setting overriding the user preference (very useful before batch issue operations, to disable e-mail sending completely)</li><li>• A default setting for the project unless the user changes his/her preference.</li></ul>
