

Redmine - Feature #1006

Display thumbnails of attached images

2008-04-07 00:23 - Andrew Ness

Status:	Closed	Start date:	2008-04-07

Target version:	2.1.0		
Resolution:	Fixed		

Description

It would be nice to display a thumbnail of images that are attached to an issue. If you click the thumbnail you would see the entire image.

Associated revisions

Revision 9933 - 2012-07-07 15:48 - Jean-Philippe Lang

Displays thumbnails of attached images of the issue view (#1006).

This behaviour can be turned on/off in Settings -> Display (off by default). Thumbnail size can be configured there too.

Revision 9934 - 2012-07-07 15:48 - Jean-Philippe Lang

Fills locales (#1006).

History

Please test my patch from [#1023](#)

#2 - 2008-07-03 22:01 - Marcello Henrique

+1

#3 - 2010-01-12 20:31 - Alex Last

is it possible to include this feature into versions 0.9.1 or 1.0?

#4 - 2010-07-22 18:07 - Patrick Dubois

+1. I would also find this very useful. People are much more likely to look at the attached image if there's a thumbnail preview.

#5 - 2011-03-24 08:34 - Toshi MARUYAMA

- Category changed from Issues to Attachments

#6 - 2011-10-27 19:20 - Etienne Massip

- Category changed from Attachments to Wiki

There is a lot of ideas in [#3510](#) and [#6205](#).

#7 - 2011-10-27 19:20 - Etienne Massip

- Target version set to Candidate for next major release

#8 - 2011-10-27 19:22 - Andrew Ness

Why did you change the category to Wiki? This issue is about thumbnails of attachments in issues, not on the wiki.

#9 - 2011-10-27 19:27 - Etienne Massip

It's the same thing, same code.

#10 - 2011-12-28 13:09 - Chien Nguyen

- Assignee set to Etienne Massip

I am using Redmine 1.3.0. This feature is not working in this version right? How can we add this to 1.3.0? Please support.

#11 - 2012-01-04 09:25 - Etienne Massip

- Assignee deleted (Etienne Massip)

#12 - 2012-07-07 15:51 - Jean-Philippe Lang

- File thumbnails.png added

- Category changed from Wiki to Attachments

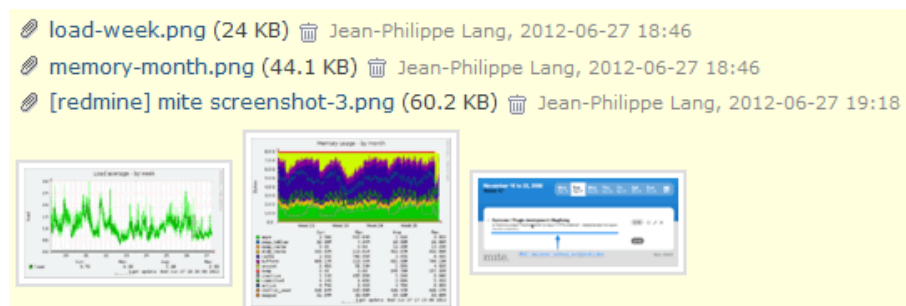

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Target version changed from Candidate for next major release to 2.1.0

- Resolution set to Fixed

Feature added in [#9933](#). Thumbnails of attached images can be displayed on the issue detail view (see Settings -> Display).

#13 - 2012-07-07 20:19 - rm user

- Status changed from Closed to Reopened

Hi! Thanks for this, but it's really not convenient this way.

Any chance of making clickable thumbs? (see redmine_lightbox plugin here - http://www.redmine.org/plugins/redmine_lightbox)

Thanks for your effort.

EDIT: or they are clickable ? is there an example of issue?

Thanks.

#14 - 2012-07-07 20:41 - Jean-Philippe Lang

- Status changed from Reopened to Closed

They are clickable. It's just a screenshot above...

did you use lightbox? or if i click on image it'd be just a link to full-image ?

any example here? what about 1.4 version - will it be included there as well?

thanks

No lightbox, just a link to the full image. You can have a look at [r9933](#) for more details.

No example here, feature was committed today in trunk. I'm afraid it won't be merged into 1.4-stable.

No example here, feature was committed today in trunk. I'm afraid it won't be merged into 1.4-stable.

OK, thanks, I will use lightbox plugin for now :) It works perfect and handy.

What about large images pasted into comments / issue descriptions / wiki ? (it'd be good to automatically resize them and display full-sized on click).

#18 - 2012-07-09 09:13 - Etienne Massip

This is discussed in another request but it is already possible to set specific sizes using [textile css syntax](#) `!{width: 50px}my_picture.png!`.

#19 - 2012-07-19 07:52 - Vitaly Klimov

I would like to propose to keep generated thumbnails in attachments folder instead of a temp one, because thumbnails are not really temp files - they should present as long as image itself exists and valid.

#20 - 2012-07-25 08:28 - Jean-Philippe Lang

Personally, i wouldn't like them to be mixed with the files that i have to backup. Thumbnails can be generated from real data files, they are temporary files for me.

#21 - 2012-07-25 10:07 - yac yac

I think it would be nice to reach a common ground on the files fs location. I agree they aren't temporary, se we shouldn't lose them eg. in reboot. But they are derived. I'd like to have the option to simply backup just the base files without derived ones. And if I do want to, adding backup of the derived files is as simple as adding an item to a list.

#22 - 2012-09-28 15:37 - Luis Serrano Aranda

It is possible add the thumbnail and / or inside the history when redmine write **attached the file ...**
So no need to go to the top of the issue to see the image

Thanks in advance

#23 - 2019-10-14 08:54 - Go MAEDA

- Related to Feature #32249: Show attachment thumbnails by default added
