

Redmine - Defect #10085

500 Server error when invalid assigned_to_id parameter passed

2012-01-30 00:15 - James Kyle

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.2
Resolution:	Cant reproduce		
Description			
Redmine 1.2.2			
Example:			
<pre>curl -k -IL -H"X-Redmine-API-Key:\$apikey" "https://\${url}/issues.json?limit=1&project_id=94&status_id=closed&assigned_to_id=jkyle"</pre>			
'jkyle' is an invalid value as assigned_to_id requires a int. But it appears this is unhandled as the response is			
<pre>Content-Length: 1 Status: 500 Connection: close Content-Type: application/json; charset=utf-8</pre>			
If strict typing is enforced, I'd expect a 400. Otherwise a 404.			

History

#1 - 2012-02-02 23:47 - Jean-Philippe Lang

According to RFC2616:

```
500 Internal Server Error:
The server encountered an unexpected condition which prevented it from fulfilling the request.
```

That seems appropriate :-)

#2 - 2012-02-02 23:55 - Jean-Philippe Lang

- Resolution set to Cant reproduce

That said, I can't reproduce. I'm getting a 200 reponse with an empty result set.

#3 - 2017-01-11 10:46 - Go MAEDA

- Status changed from New to Closed

I cannot reproduce in 3.3.
I am closing this issue.
