Description
It would by nice to have ability to play video in Redmine (wiki, issues, documents)
I would prefer to have HTML5 video player, but Adobe Flash would be ok too.

- Target version set to Candidate for next major release

It should be very interesting to have this functionality work like it does for images.

#3 - 2012-02-03 00:38 - Daniel Morgan

I currently use the plugin attached in [#5171](#).
Have it working fine with the latest release of Redmine.

#4 - 2013-07-15 07:31 - Maxime Vez

Yes, being able to play .webm or .ogv video would be great. They added TimeMediaHandler on wikipedia (
https://www.mediawiki.org/wiki/Extension:TimedMediaHandler)

#5 - 2014-03-05 10:49 - Ivan Cenov

I would like to see ability to play youtube videos too.

#6 - 2016-07-23 09:51 - Anh Le Giang

+ 1 to me. Now we have to download every attached video file

#7 - 2016-11-23 00:22 - Ryan Bond

+ 1 here as well. We're using Redmine for videogame QA and have a lot of game playthough videos on bugs. Ability to stream from youtube would save our server space, make backups smaller, allow the videos to be streamed rather than have to download first, etc. Thanks!

#8 - 2016-12-21 13:31 - Jonatã Bolzan Loss

+1

both <video>(.mp4) and <audio>(.mp3) support

Patch [#22112](#)

#10 - 2017-03-05 03:27 - Toshi MARUYAMA

- Related to Patch #22112: add html5 audio controls if attachment is mp3 added

#11 - 2017-11-21 01:12 - Go MAEDA

- Related to Patch #27336: Render previews for audio and video files added

#12 - 2017-11-21 01:17 - Go MAEDA

A patch to add HTML5 video/audio player has been submitted as [#27336](#).

#13 - 2018-05-17 15:26 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

The patch that adds video/audio player was committed for upcoming Redmine 4.0.0. See [#27336](#) for the detail.
