Description

The List type for custom fields is a powerful feature, but would be handy to allow a List Multiple selection type also. My use case is for listing additional resource contacts for a given issue (who are external to our system and therefore can't be listed as the User type), though I'm sure it could come in handy for other situations as well.

A Multiple User field could be very handy as well.

- Status changed from New to Closed

- Resolution set to Duplicate

Same as #1189 which is already implemented for 1.4.0.
