Redmine - Feature #1029

Special handling for .diff/.patch attachments

2008-04-09 22:04 - Rocco Stanzione

Status:	Closed		**Start date:**	2008-04-09
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	UI		**Estimated time:**	0.00 hour
Target version:	0.8			
Resolution:	Fixed			

Description
I suppose it's your webserver's mime type config, but if I click on a diff attached to an issue, the browser thinks it's a binary file and wants to download it. Even better than fixing that, I think, would be to treat it specially (like images) and view it in something like the SCM diff viewer.

One alternative to special treatment of *.diff and *.patch... what Launchpad does is give you a checkbox to say the attachment is a patch. This could also trigger an indicator that someone has attached a resolution to an issue, which could be of use to developers.

> I suppose it's your webserver's mime type config

Actually it's not my webserver, download is forced unless the attachment is an image:
source:/trunk/app/controllers/attachments_controller.rb#L26

#3 - 2008-06-14 17:29 - Jean-Philippe Lang

- *Status changed from New to Closed*

- *Target version set to 0.8*

- *Resolution set to Fixed*

Diff viewer added in r1516.
Rocco, the simpliest way to tell that an issue is resolved is to mark it as 'Resolved' :-)
