Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>Hi guys,</p> <p>I'm iPhone developer but I've to setup redmine for my company.</p> <p>I'm working on it from about 3 days and can't fix one problem.</p> <p>I want authentication via apache2 + redmine + svn + https + postgres on Ubuntu 11.10.</p> <p>I've created few repositories manually and added files there.</p> <p>I followed:</p> <p>http://www.redmine.org/projects/redmine/wiki/Repositories_access_control_with_apache_mod_dav_svn_and_mod_perl</p> <p>Looks like I'm able to login to svn(when i try to checkout project) with redmine db user (because it's giving me other info when I fill wrong password or user), but I can't access repositories.</p> <p>I'm getting:</p> <p>You don't have permission to access /svn/bada-sprint on this server.</p> <p>Tried about 100 solutions but nothings helps: permissions to www-data for svn folder, etc.</p> <p>Here is my /etc/apache2/sites-enabled/myown-ssl file:</p> <pre>@<VirtualHost *:443> ServerAdmin webmaster@localhost 1. <Limit GET PROPFIND OPTIONS REPORT> 2. Require valid-user 3. Allow from all 4. Satisfy any 5. </Limit> 6. AuthUserFile /etc/subversion/passwd # write access 7. <LimitExcept GET PROPFIND OPTIONS REPORT> Require valid-user 8. </LimitExcept> 1. for mysql #RedmineDSN "DBI:mysql:database=databasename;host=my.db.server" 2. for postgres RedmineDSN "DBI:Pg:dbname=redmine_default;host=localhost" 3. for SQLite3 1. RedmineDSN "DBI:SQLite:dbname=database.db" RedmineDbUser "redmine" RedmineDbPass "xxxxx" #SSLRequireSSL <Location> SSLEngine on SSLCertificateFile /etc/apache2/ssl/apache.pem SSLProtocol all SSLCipherSuite HIGH:MEDIUM </VirtualHost> @</pre>			

Please help, I really want to make it working.

History

#1 - 2012-03-05 01:15 - Andrey Avramovitch

- *File myown-ssl added*

Attaching file which didn't show properly in code tags.

#2 - 2012-03-05 09:34 - Etienne Massip

- *Status changed from New to Closed*

- *Resolution set to Invalid*

This tracker is for Redmine bugs and Feature requests only; for support please consider posting in [Help](#) form.
