<b>Description</b>			
In the "Submissions" Wiki page ( <a href="http://www.redmine.org/projects/redmine/wiki/Submissions">http://www.redmine.org/projects/redmine/wiki/Submissions</a> ) there is a point:			
<ul style="list-style-type: none"><li>• please DON'T assign the feature request to anybody, let the developers deal with it</li></ul>			
I have this problem now, because client keeps assigning developers to all of the submitted issues, despite telling them not to do that. Please <b>implement a permission "Assign users to issues"</b> , so that users without that permission <b>won't even see a "Assignee" field</b> .

- Status changed from New to Resolved

I see now that there is a "Fields permissions" tab in Workflow settings and setting certain fields as read-only fixes my issue. Don't know in which version it was introduced, but it's resolved for me, thanks.
