Target version:			
Resolution:	Fixed		

Description

When copying an issue, I often want to change the title of the ticket before it is saved. The current copy screen doesn't allow me to do that. I have to click 'Copy and follow' and then change the properties of the ticket.

History

#1 - 2015-04-04 11:54 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Fixed

Now we can edit the subject when copying a issue (maybe related to [#5950](#), [#7603](#)).
I close this issue.
