

Redmine - Defect #10563

reposman.rb fails to add svn repository when we have one project with git

2012-03-29 11:58 - Jevgen Gyrynovych

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.0
Resolution:	Duplicate		
Description			
When I runing:			
<pre>/usr/share/redmine-1.2.0/extra/svn/reposman.rb --redmine https://example.com --key=mykey --svn-dir /var/svn --owner www-data --url http://example.com/svn-private/ --verbose</pre>			
for create svn repository for new project I got:			
Unable to connect to https://example.com/sys/: wrong constant name Feature-twitter-oauth			
The most projects uses svn, but I have one project with git. And "Feature-twitter-oauth" - the name of one branch in this repository. When I disable project with git - reposman.rb works correct again.			
<pre><homepage></homepage> <id type="integer">55</id> <identifier>myproject-com</identifier> <is-public type="boolean">false</is-public> <lft type="integer">129</lft> <name>twiseller.com</name> <parent-id type="integer" nil="true"></parent-id> <rgt type="integer">130</rgt> <status type="integer">1</status> <updated-on type="datetime">2012-03-29T12:17:03+03:00</updated-on> <repository> <extra-info type="yaml">---</pre>

Is duplicate of Redmine - Defect #8707: Reposman: wrong constant name		Closed	2011-06-29

History

#1 - 2012-03-29 15:45 - Terence Mill

We also would like to mix svn and git repos in redmine an both shall work on ldap/webdav and with auto repo cretion via reposman. Does anyone got this working together?

#2 - 2012-03-29 21:28 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Duplicate

Same as [#8707](#), fixed in 1.2.3.
