

Redmine - Feature #1060

Add a LDAP-filter using external auth sources

2008-04-15 09:01 - Lionel Molinier

Status:	Closed	Start date:	2008-04-15
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	LDAP	Estimated time:	0.00 hour
Target version:	1.4.0		
Resolution:	Fixed		
Description For now, the LDAP authentication does not support LDAP-filter, which can be helpful for some installation. This patch is providing this filter, directly configurable in the web interface

Yes, this possibility is desirable.

#2 - 2008-04-29 21:45 - Jeffrey Price

I would love to see a patch from 0.6.4 with this feature (or even 0.7 when it comes out). The above patch appears to be 0.6.3.

#3 - 2008-08-28 21:03 - Lionel Molinier

- File *ldap_filter.0.7.3.x3n.patch* added

I've recently updated my server to the 0.7.3 release and so my patch. I've been using it for months now and it works quite good. I hope it will be integrated into the trunk one day. I can do the adaptation job if developers are too busy.

Thanks,
x3n

#6 - 2011-04-19 13:30 - Florian Mutter

This Patch is available since 3 Years now and still not in Redmine... Is there any chance it will be included some day? I think this feature is mandatory for LDAP authentication.

- File *ldap_filter_r5657.patch* added

- File *net-ldap-0.2.2_r5657.patch* added

Hey,

I adapted the patch above to the current svn version ([r5657](#)). I also added some things to prevent crashes, if no filter is supplied. I also created a patch to update net::Ldap to the latest stable version (0.2.2). I hope you can give me some feedback on these two patches.

Greetings elm

#8 - 2011-05-06 15:24 - Terence Mill

Does this support Ldap groups also?

#9 - 2011-05-09 12:05 - Florian Mutter

Hey,

This Patch does allow to restrict the possible Users that are allowed to Login. It does not make any informations that are in the Ldap Directory available to redmine. You can specify a Filter As described here: <http://www.selfadsi.de/ldap-filter.htm>

This provides a simple method to specify a Ldapgroup that is allowed to login. But it does not allow you to specify groups that will be admins if the Login or groups that will be developers. For this purpose there are other patches here available. I think they can be combined with this patch if they are based on net::Ldap which some are.
