Description

A lot of problems on this tracker can be solved by adding a templates in Redmine.
Templates of projects, tasks, users ...

Template - it is an object of the same type that is marked in any way.
When creating a new object the user is prompted to choose a template for that object.
One of the templates can be assigned as the default template.
The selected template is copied to the new object.

History

#1 - 2012-04-07 10:14 - Ivan Cenov

Concerning issues, there is a new plugin for Issue templates. You may take a look at it.

#2 - 2013-02-27 14:38 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Duplicate

This is dupe of #643 for issues and of more already open issues for project, etc.
