

Redmine - Defect #10761

Rest API JSON response can not be parsed by jQuery

2012-04-25 05:02 - Toshiya TSURU

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	1.3.3
Resolution:	Duplicate		
Description			
When I tried to get data via Rest API with json formatting, I got an error message saying "Uncaught SyntaxError: Unexpected token ':' with Chrome 18, jQuery 1.7.2.			
Here is the javascript code :			
<pre>\$(function() { \$.ajax({ type : 'GET', url : "http://www.redmine.org/trackers.json", success : function(data) { alert(data); }, dataType : 'jsonp' }); });</pre>			
But the confusing thing is that the response of the API seems to be valid...			
http://www.redmine.org/trackers.json			
Then, I tired to call Wikipedia API in the same javascript code, This was successfully done.			
<pre>\$(function() { \$.ajax({ type : 'GET', url : "en.wikipedia.org/w/api.php?action=query&titles=redmine&prop=info&redirects=&format=json", success : function(data) { alert(data); }, dataType : 'jsonp' }); });</pre>

First of all, does Redmine-REST-API support [JSONP](#)? (I found your issue with google because I was researching, if Redmine supports JSONP. I need JSONP)

It seems like [JSONP](#) is not supported. You can try it with this query for your issue: <http://www.redmine.org/issues/10761.json?callback=dd>

The response should be:

```
dd({"issue":{"author":{"name":"Toshiya TSURU","id":2509},.....})
```

But it's still:

```
{{"issue":{"author":{"name":"Toshiya TSURU","id":2509},.....}}
```

- *Status changed from New to Closed*

- *Resolution set to Duplicate*

#3 - 2012-07-27 21:59 - Jean-Philippe Lang

JSONP support added in [r10088](#) for 2.1.0.
