<b>Description</b>			
<p>Although wiki page RedmineInstall says Redmine 1.4.x works with Ruby 1.9.x, either should be noticed at docs that automatic scm creation and utilities (aka Reposman) will not work or replace reposman.rb dependency on <b>rdoc/usage</b> by <b>optparse</b>. Rdoc::usage has been removed from ruby 1.9.</p> <p>Side note 1: this should be really simple fix, but I've just started learning Ruby :/</p>
