

Redmine - Defect #10871

Upgrade to 1.4.1 does not work

2012-05-10 07:50 - Dominik Stankowski

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Affected version: 1.4.1
Resolution: Invalid	

Description

When I try to upgrade from Redmine 1.3.3 to 1.4.1

```
rake db:migrate RAILS_ENV=development
```

asks me to run "bundle install" which produces the following error:

```
bundle install
Fetching gem metadata from http://rubygems.org/.....
Using rake (0.9.2.2)
Using activesupport (2.3.14)
Using rack (1.1.3)
Using actionpack (2.3.14)
Using actionmailer (2.3.14)
Using activerecord (2.3.14)

NoMethodError: undefined method `spec' for nil:NilClass
An error occured while installing activerecord (2.3.14), and Bundler cannot continue.
Make sure that `gem install activerecord -v '2.3.14'` succeeds before bundling.
```

Any thoughts/hints?

History

#1 - 2012-05-10 09:46 - Stephan -

Did you also tried gem install activerecord -v '2.3.14' as suggested?

Sometimes it does work.

#2 - 2012-05-10 12:05 - Dominik Stankowski

Unfortunately, this did not help

```
$ gem install activerecord -v '2.3.14'
ERROR: While executing gem ... (NoMethodError)
  undefined method `spec' for nil:NilClass
```

#3 - 2012-05-10 18:02 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

Closed since this is not a Redmine specific issue.

GIYF, found [some page](#) which seems related, didn't check further thought.
