<b>Target version:</b>	<b>Affected version:</b> 2.0.0
<b>Resolution:</b> Invalid	

**Description**

I just migrated my redmine to 2.0.0 and I couldn't edit projects with repositories configured. I temporally solved the error by truncating the repositories table, but it's not a cute solution.

The error message posted on my server was the following

ActionView::Template::Error (The single-table inheritance mechanism failed to locate the subclass: 'Mercurial'. This error is raised because the column 'type' is reserved for storing the class in case of inheritance. Please rename this column if you didn't intend it to be used for storing the inheritance class or overwrite Repository.inheritance\_column to use another column for that information.):

```

Did you run "db:migrate"?

[source:tags/2.0.0/db/migrate/20120422150750\\_change\\_repositories\\_to\\_full\\_sti.rb](source:tags/2.0.0/db/migrate/20120422150750_change_repositories_to_full_sti.rb)

##### #2 - 2012-05-17 09:20 - Lleir Borràs

- Status changed from New to Resolved

Ok my fault... Sorry

##### #3 - 2012-05-17 09:23 - Toshi MARUYAMA

- Status changed from Resolved to Closed

- Resolution set to Invalid
