

Redmine - Defect #10965

rake yard does not work for generating documentation.

2012-05-18 10:53 - Antoine Rodriguez

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	2.0.1	Affected version:	2.0.0
Resolution:	Fixed		
Description			
Procedure to reproduce the trouble :			
<ol style="list-style-type: none">1. Install Yard : <code>gem install yard</code>2. Generate documentation, from root redmine folder : <code>rake yard</code>			
Symptoms are :			
<ul style="list-style-type: none">• rake yard ends with error :			
<pre>rake aborted! Don't know how to build task 'yard'</pre>			
<pre>(See full trace by running task with --trace)</pre>			
Environment:			
<ul style="list-style-type: none">• Redmine version: 2.0.0.stable• Ruby version: 1.8.7 (x86_64-linux)• Rails version: 3.2.3• Environment: production• Database adapter: MySQL• Yard : 0.8.1

Revision 9701 - 2012-05-18 15:52 - Etienne Massip

Added yard to development gems.

History

#1 - 2012-05-18 15:53 - Etienne Massip

- Status changed from New to Resolved

- Target version set to 2.0.1

- Resolution set to Fixed

Thanks, fixed with [r9701](#).

#2 - 2012-05-21 08:33 - Antoine Rodriguez

Applied the fix but nothing has changed still having the same error.

Best regards,

#3 - 2012-05-21 11:27 - Etienne Massip

Did you bundle install?

#4 - 2012-05-21 11:47 - Antoine Rodriguez

I've installed 2.0.0 with the bundle at rubyforge.

Then I've applied the 3 releases(up to [r9701](#))

I've restarted

And tried under production and then under development RAILS_ENV var

Did I miss something ?

Best regards,

#5 - 2012-05-21 13:42 - Etienne Massip

Yes, you need to do a bundle install to update your bundle.

#6 - 2012-05-21 14:16 - Antoine Rodriguez

I've made it and nothing changed ... still having the issue.

However I've already installed yard before as I've mentioned in the ticket. shall I uninstall it and make a bundle install ?

#7 - 2012-05-21 14:46 - Etienne Massip

rake yard is designed to run on development (like rdoc) so you have to include the development group in your bundle and run rake in development RAILS_ENV.

If you have bundle install --without development ... in the first place then bundle install won't change your bundle since [--without is a remembered option](#), so you have to delete and recreate your bundle.

#8 - 2012-05-22 13:44 - Antoine Rodriguez

- *File output.txt added*

I've deleted the .bundle folder inside the redmine root folder and made a bundle install without any other option.

After the completion of the command I've made the following :

1. export RAILS_ENV=development
2. rake yard

rake yard worked but with a lot of warnings.

At the end the doc has been generated into the doc/app folder inside the redmine root folder.

You can appreciate the warnings inside the output.txt that I've uploaded with this message.

Thank you very much. Original bug is fixed.

#9 - 2012-05-26 11:46 - Jean-Philippe Lang

- *Target version changed from 2.0.1 to 2.1.0*

Not sure that this one is really needed in the core. I think that Gemfile.local would be a more appropriate place to add it for those who want to use extra rake tasks. Any suggestions?

#10 - 2012-05-27 12:45 - Antoine Rodriguez

What would be the advantages of putting it in the Gemfile.local instead than the core knowing that it is equally important than the project ?

Best regards,

I think that > 99% of users won't need it.

#12 - 2012-05-27 17:01 - Etienne Massip

I would treat it just as rdoc?

Rake task was already here in < [2.0.0](#), that's why I considered it as a regression.

#13 - 2012-05-27 17:06 - Etienne Massip

It doesn't make sense to have a [source:/branches/2.0-stable/lib/tasks/yardoc.rake](#) and not have yard task available because of a missing entry in Gemfile, does it?

#14 - 2012-05-27 18:02 - Antoine Rodriguez

having documentation up to date is being sure of having more participation in the project and having more plugins

For core developpers is also a good tool

#15 - 2012-05-27 21:25 - Jean-Philippe Lang

- *Status changed from Resolved to Closed*
- *Target version changed from 2.1.0 to 2.0.1*

You're right, it's merged for 2.0.1.
