<b>Target version:</b>	2.0.1	<b>Affected version:</b>	2.0.0
<b>Resolution:</b>	Fixed		
<b>Description</b>			
Hi Everyone,			
I have just updated to Redmine 2.0 and it seems that I can't fetch incoming emails anymore.			
For fetching them I use a cron job like: rake -f /path/to/redmine/Rakefile redmine:email:receive_imap RAILS_ENV="production" host=imap.gmail.com port=993 ssl=1 username= <a href="mailto:redmine@domain.com">redmine@domain.com</a> password=*****			
When there's no email to fetch the above command is not throwing any error but when an email is received it throws: <i>rake aborted!</i> <i>uninitialized constant RAILS_DEFAULT_LOGGER</i>			
Database: MySQL 5.1.61 Ruby version 1.8.7 (x86_64-linux) RubyGems version 1.8.17 Rack version 1.4 Rails version 3.2.3 Redmine version 2.0			
<b>Error stack trace:</b>

### Revision 9712 - 2012-05-25 18:54 - Jean-Philippe Lang

Replace RAILS\_DEFAULT\_LOGGER with ::Rails.logger (#11013).

## History

---

### #1 - 2012-05-24 11:11 - Etienne Massip

- Status changed from *New* to *Confirmed*

- Target version set to *2.0.1*

Indeed, deprecated constant [has been removed 2 years ago](#).

### #2 - 2012-05-24 14:24 - Andrei Neacsu

I have been able to fix it by changing the lib/redmine/imap.rb file's lines:

```
def logger
  RAILS_DEFAULT_LOGGER
end
```

in

```
def logger
  Logger.new(STDERR)
end
```

I'm not a Ruby developer, so I really don't know if this is the best way of do it. I just had to find a quick path in order to activate this feature, since redmine is running on my company's development server.

### #3 - 2012-05-24 14:58 - Etienne Massip

I think it should be replaced by ::Rails.logger.

### #4 - 2012-05-24 15:19 - Andrei Neacsu

You are right.

Thank you very much for your help.

The same issue is valid for pop3.rb.

### #5 - 2012-05-25 18:54 - Jean-Philippe Lang

- Status changed from *Confirmed* to *Resolved*

- Resolution set to *Fixed*

Fix committed in [r9712](#), thanks.

### #6 - 2012-05-25 18:54 - Jean-Philippe Lang

- Subject changed from *Fetching Email from IMAP - uninitialized constant RAILS\_DEFAULT\_LOGGER error* to *Fetching Email from IMAP/POP3 - uninitialized constant RAILS\_DEFAULT\_LOGGER error*

### #7 - 2012-05-26 11:48 - Jean-Philippe Lang

- Status changed from *Resolved* to *Closed*

Merged.
