<b>Resolution:</b>	Fixed		
<b>Description</b>			
On Redmine 2.0.0, by following the tutorial on creating a new plugin ( <a href="#">Plugin Tutorial</a> ), the following command:			
<pre>ruby script/generate redmine_plugin_model polls poll question:string yes:integer no:integer</pre>			
which actually I launched as:			
<pre>./script/rails generate redmine_plugin_model polls poll question:string yes:integer no:integer</pre>			
does not generate the migration files, but it generates only these two files:			
<pre>create plugins/polls/app/models/poll.rb create plugins/polls/test/unit/poll_test.rb</pre>
