Description

Hi,

Can you upgrade nokogiri?
Here's my fully fedora 16 working launch command for redmine (same for trunk): ruby /var/www/redmine/redmine-2.0/script/rails
server webrick -e production &

And here is the output with Fedora 17:
/usr/local/share/gems/gems/nokogiri-1.5.2/lib/nokogiri.rb:27:in `require': cannot load such file -- nokogiri/nokogiri (LoadError)
from /usr/local/share/gems/gems/nokogiri-1.5.2/lib/nokogiri.rb:27:in `<top (required)>'

after investigation, error is the same as 11071, please forgot the nokogiri message

#3 - 2012-06-05 23:03 - Charlie Mordant

It's not a true duplicate, the error is the same but it's when we launch webrick

What do you mean? nokogiri is not a Redmine dependency. I'm running it without this gem actually.

yum install redhat-rpm-config
How it possible - I don't know, but it's help me after long quest... After it in necessary to install RMagick by yum. Before it I've install gcc and development group, but it's other story. Good luck.
