<b>Description</b> This product rocks. Here are some things I'd love to be able to do:  <ol style="list-style-type: none"><li>1. Control the placement/order in which fields are shown on the issue forms</li><li>2. Allow admin to dynamically decide which fields are shown based on role</li><li>3. Allow admin to make any field required (status workflow stuff is already pretty great)</li></ol> Keep up the good work guys -- highly appreciated!
