| Description If Wiki diff has a new line (not a changed line), diff page may generates broken HTML like: <pre><div class="text-diff"> h1. CookBook documentation Some updated [[documentation]] here... More contents...&lt;/span&gt; </div></pre> Close tag is escaped. For example: Before <pre>h1. CookBook documentation Some updated [[documentation]] here...</pre> After: <pre>h1. CookBook documentation Some updated [[documentation]] here... More contents...</pre> "More contents..." line is added. This case, diff page generates broken HTML. | | | |

- File 0001-Fix-too-escaped-span-in-diff-page-for-Wiki-11209.patch added

I attach a patch and test case for this issue.
It adds a new fixture data. So it may break other tests. I only tested this patch against test/functional/wiki_controller_test.rb. Sorry.
