Redmine - Defect #11262

Link is escaped in wiki added/updated notification email

2012-06-26 13:27 - Łukasz Jachymczyk

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Łukasz Jachymczyk		**% Done:**	0%
Category:	Email notifications		**Estimated time:**	0.00 hour
Target version:	2.0.4			
Resolution:	Fixed		**Affected version:**	2.0.3

Description

After wiki page update/addition a notification mail is generated. This mail contains localized message
:mail_body_wiki_content_updated with interpolated html link to wiki page (:id argument).

Currently, this generated message is treated as html unsafe and thus all tags are escaped. The workaround is to call html_safe
method on localized message. Attached patch contains implementation of this workaround and unit tests covering this issue.

Please let me know if there is a better solution.

_____

```
Ruby version            1.8.7 (x86_64-linux)
RubyGems version        1.3.7
